

CoolDry roof paint reflects sunlight and
reduces costs for air conditioning by up to 50 %!

COOLDRY saves money, reduces room temperature and protects your roof.

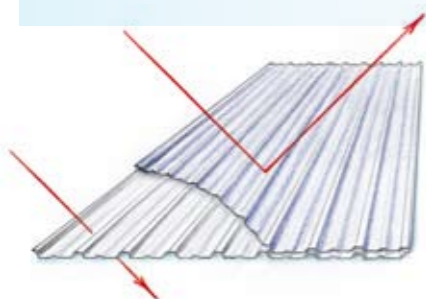

COOLDRY – what is it?

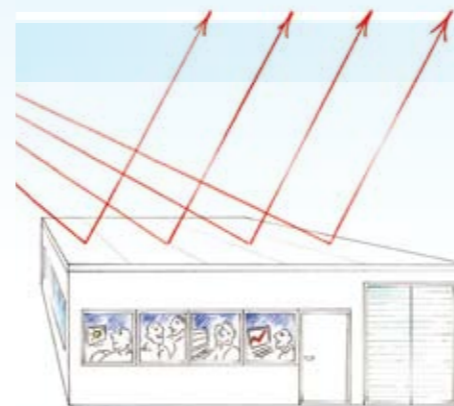

- › rollable, brushable, sprayable matt roof-coating
- › contains hightech reflective components (coated, hollow glass beads)
- › seals the roof against rain
- › low cost application: brush, roller, airless spray
- › excellent adhesion to almost any surface
- › highly flexible and long lasting

COOLDRY – how does it work?

- › CoolDry reflects up to 90% of solar energy (heat, light, UV-light)
- › significant reduction of roof temperature (up to 40 °C)
- › your building stays considerably cooler inside

The efficiency of CoolDry depends on the construction, location, insulation and other sources of heat inside the building, as well as on the sun's wave angle, windows etc.

COOLDRY – what is your benefit?

- › significant savings on air conditioning (up to 50%)
- › more comfortable temperature = improved work efficiency and safety
- › less air conditioning power required = longer lifetime and lower maintenance costs
- › long-lasting protection against: bitumen-membrane cracking, UV light degradation, rainwater
- › enhancement, extended usability and value-protection of your building
- › easy and low-cost application

COOLDRY – how to apply it?

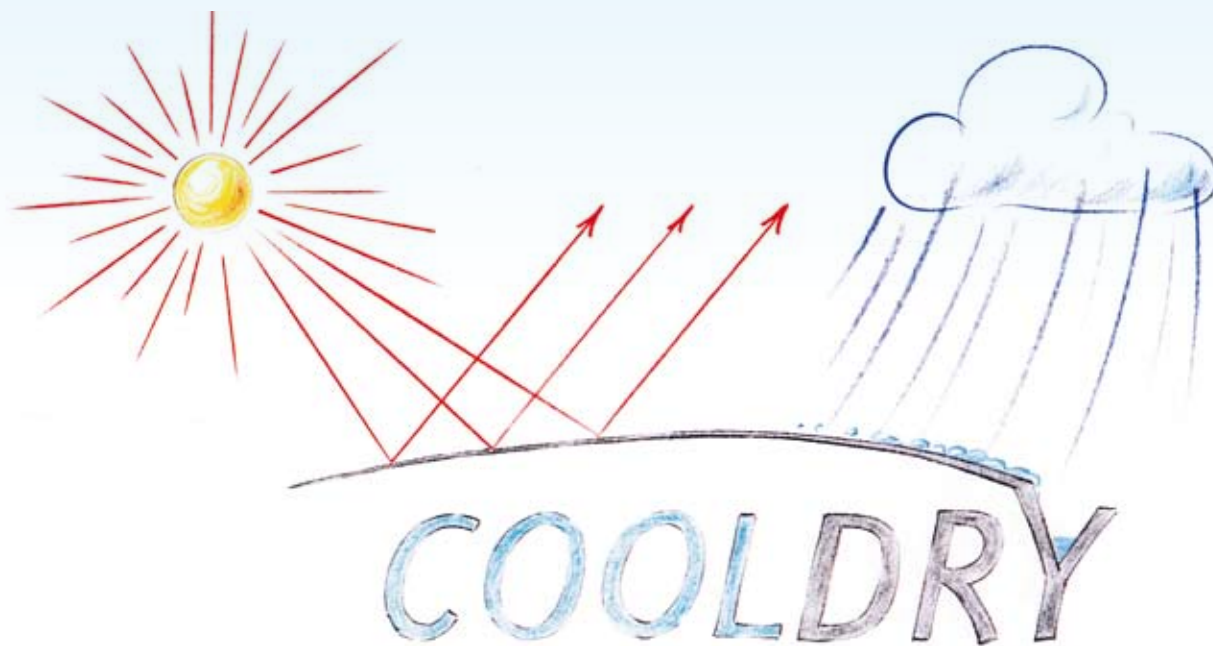

- › application in 2 coats without dilution. Ready for use by brush, roller or airless spray. Allow 16 hours between coats.
- › one liter of CoolDry covers 1,5 m² (when applying 2 coats)
- › suitable for virtually any substrate: concrete, bitumen-membrane, bricks, stone, cement, wood, primed metal
- › CoolDry is environment-friendly and can be applied by anybody

Available in the following units

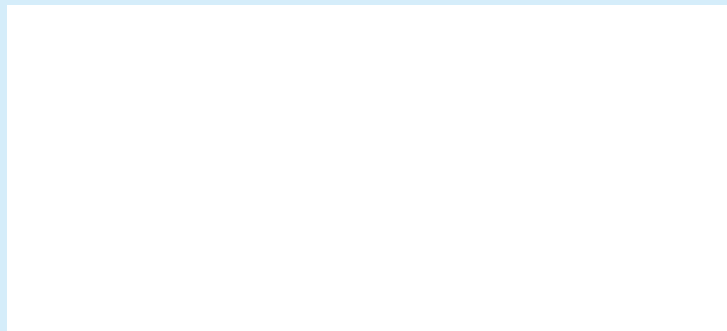

2,5 Litres white (for ca. 3,75 m²) // **5,0 Litres white** (for ca. 7,5 m²) // **10,0 Litres white** (for ca. 15 m²)

Other colours on request.

COOL IN SUMMER – DRY IN WINTER.
